There are six glasses in a line.
Put them in the correct order.

The last glass is tall, and it is empty.

You need these glasses:

The second glass is empty.

The first glass is full of orange juice.

The fourth glass is full of grape juice

The third glass and the last glass are both tall.

The fifth glass is half full.

The third glass is half full.

The two glasses with grape juice are next to each other.
