

# Strike It Out Proof Sorter 1

Therefore, on a 0-20 number line we cannot ever use up all the numbers.

This is true if you use addition, or if you use subtraction, in your number sentence.

The rules of the game say that we cannot use a number once it has been crossed off, so this does not obey the rules of the game.

If you use zero in a number sentence then all three numbers are not different.

Therefore, on a 0-20 number line we cannot ever use up all the numbers.

This is true if you use addition, or if you use subtraction, in your number sentence.

The rules of the game say that we cannot use a number once it has been crossed off, so this does not obey the rules of the game.

If you use zero in a number sentence then all three numbers are not different.
